

D2.8 Report on status of posting results in the study registry

[confidential]

Submitted: March 2022

Summary

This document details the status of posting results of the technical validation study in the trial registry. In addition, it provides an overview of the upcoming results and ongoing dissemination activities related to the technical validation study.

The Technical Validation Study (TVS) was registered on ISRCTN registry on November 4, 2019, under the title *Validating digital mobility assessment using wearable technology*. In line with the registry guidelines, updates to the study registry were submitted throughout the study period. The protocol paper of the TVS study was registered on December 6, 2021. Recruitment ended on March 22, 2022, with 111 participants included. The end date proposed for publications of main results is April 1, 2023. In parallel to the preparation of publications, a series of free, publicly available webinars have taken place since February and will continue until April to ensure timely and wide dissemination of TVS results.
