Public Newsletter Jan-Aug 2022

Mobilise-D accelerates breakthrough innovations in digital health monitoring to assess patients' daily life mobility, focusing on different conditions that often affect mobility (COPD, PD, MS, hip fracture), with the goal to improve follow-up and personalized care of patients.

🎧 Four NEW Mobilise-D webinars this autumn 🎧

We start the autumn Mobilise-D Webinars series presenting the needs, technologies, protocols and patient perspectives for each of our four cohorts engaged in the Mobilise-D studies. [Register for FREE now!](#)

Mobilise-D

Webinar recordings available on our YouTube channel

We've had seven public webinars as part of our ongoing Mobilise-D webinar series, and it has been a great success! All recordings are now available on our [YouTube channel](#).

2135 participants enrolled by the end of August 2022

The recruitment of participants in the Clinical Validation Study has passed well over 2000 and is getting close to 90% of our target. The Parkinson's Disease and Chronic Obstructive Lung Disease cohorts are fully recruited, while the Multiple Sclerosis cohort is close to their target of 600 with 98% recruited. Our hip fracture cohort has passed the 50% mark and are currently at 57% of the 600 target.

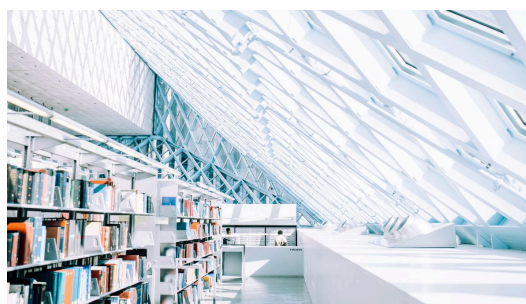

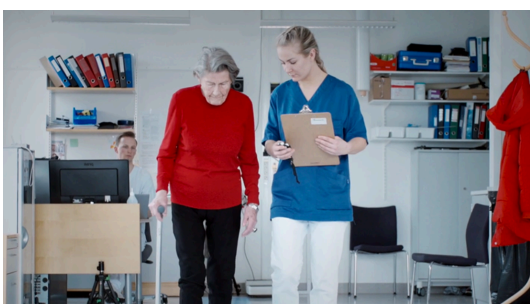

New Video: The Mobilise-D Journey

To further disseminate Mobilise-D to a wide audience, we have published a new video showing how Mobilise-D develops innovative digital technology to measure mobility when and where it matters to patients – in their daily life, thereby transforming clinical research and contributing to personalised health. Watch it [HERE](#).

"The end" of the technical validation work - Algorithm development and technical validation

The work on algorithm development and technical validation has come to an end. We cannot believe it's been three years already! Read more [HERE](#).
